

Jeremy Ray Musni

MINOR IN BIOMEDICAL SCIENCE

“This isn’t life in the fast lane, it’s life in the oncoming traffic.” (Terry Pratchett)

Regine Marinelli A. Narag

MINOR IN BIOMEDICAL SCIENCE

I have known Regine to be very vibrant and committed. She has such an infectious laugh and a brilliant smile that makes everyone around her smile easily, even during tough times. Her dedication to her work is so intense—be it post-labs, long tests, organization projects, or even participation in OrSem. Every year, she renews her commitment and pushes herself to her limits. She gets tired but chooses to be happy, because she does everything out of love. She never fails to amaze me. (P. Sacayanan)
