

Caramia Angela A. Buendia

"And once the storm is over, you won't remember how you made it through, how you managed to survive. You won't even be sure whether the storm is really over. But one thing is certain. When you come out of the storm, you won't be the same person who walked in." (Haruki Murakami)

John Emmanuel M. Cacnio

For John, College was supposed to be an escape from stagnancy. It was a chance for him to become something more than the aimlessness he struggled with. After the long and hard fight through orgs, shifting, and finding friends, it's safe to say it's been worth the wounds and he's found things worth fighting for. It's just a step into something wild and unknown, but he's sure it's a step in the right direction.
