

**Ma. Patricia Ysabel K.
Fernando**

MINOR IN KOREAN STUDIES

Patfer is a nebula, the workings of something greater than what she already is. She builds a home wherever she goes and faces the storms that threaten to topple it. She leaves young orbs of light in her trail and hopes to form galaxies in the near future. She has the essence of stars running in her veins with the hope of filling the space around her with light.

Mikaela D. Generoso

I said I couldn't, so I did.
